

Premise Health

Through your benefits plan you're gaining access to high-quality healthcare services to help you get, stay and be well.

Your Premise Health care team will go beyond merely treating the symptoms you bring to a single appointment – they'll strive to help you and your eligible family members achieve long-term, sustainable wellness.

Premise Health provides a wide range of services such as annual physicals, vaccinations, preventive screenings for early disease detection, treatment and management of conditions, provider dispensing and more!

Experience the difference.

The Premise Health team offers a unique approach compared to traditional community medical practices. You can count on care that is:

- **AFFORDABLE**

Many services are offered at a lower price than what you'll typically find at other community clinics. You can also find out what a visit is going to cost up front, meaning there are no surprises.

- **CONVENIENT**

Take advantage of same-day and next-day appointments and short wait times so you can be seen quickly.

- **PERSONAL**

Your provider will spend more time with you at every appointment, getting to know you and your medical history so they understand what makes you unique. No matter your race, religion, country of origin, sexual orientation or gender identity, we deliver a personalized experience that leads to better health.

- **CONNECTED**

Our member portal, My Premise Health, securely connects you to your providers and your care experience.

- **ACCESSIBLE**

Instead of driving across town, you can access care that's located right where you work or you can meet with a provider by phone or video.
